

200 STREET ARTERIAL HIGHWAY

ROADWORKS AND DRAINAGE DESIGN

LANGLEY, B.C.

CLIENT: MINISTRY OF TRANSPORTATION AND HIGHWAYS

Increasing traffic demand and development of adjacent properties prompted the Ministry of Transportation and Highways to retain Aplin & Martin to undertake a detailed study of alignment alternatives, assessment of impacts to adjacent properties and detailed design of road geometrics and storm sewer mains. Estimates of reconstruction costs were prepared and road right-of-way requirements were established for an 11 kilometre section of 200 Street (Carvolth Road) between Logan Avenue and 86 Avenue.
